

Details about the Construction

August 25, 2016

Construction for the solar panels is scheduled to begin October 24. Good news. Both lots will have paneling and that means shade. This is a 35 day project where the crew will leave 2/3 of lot available during construction.

During the next five months, we must keep in mind:

Your Safety:

1. Areas of campus will be taped off. Please do not go into those areas.
2. Walking to class may take a little longer. So, please arrive early.

The Traffic

1. With large construction equipment, the Sunnyside entrance may be blocked on certain days. However, assume this entrance will be blocked every day.
2. The best route will be the back entrance off of Fowler Avenue. Please see map

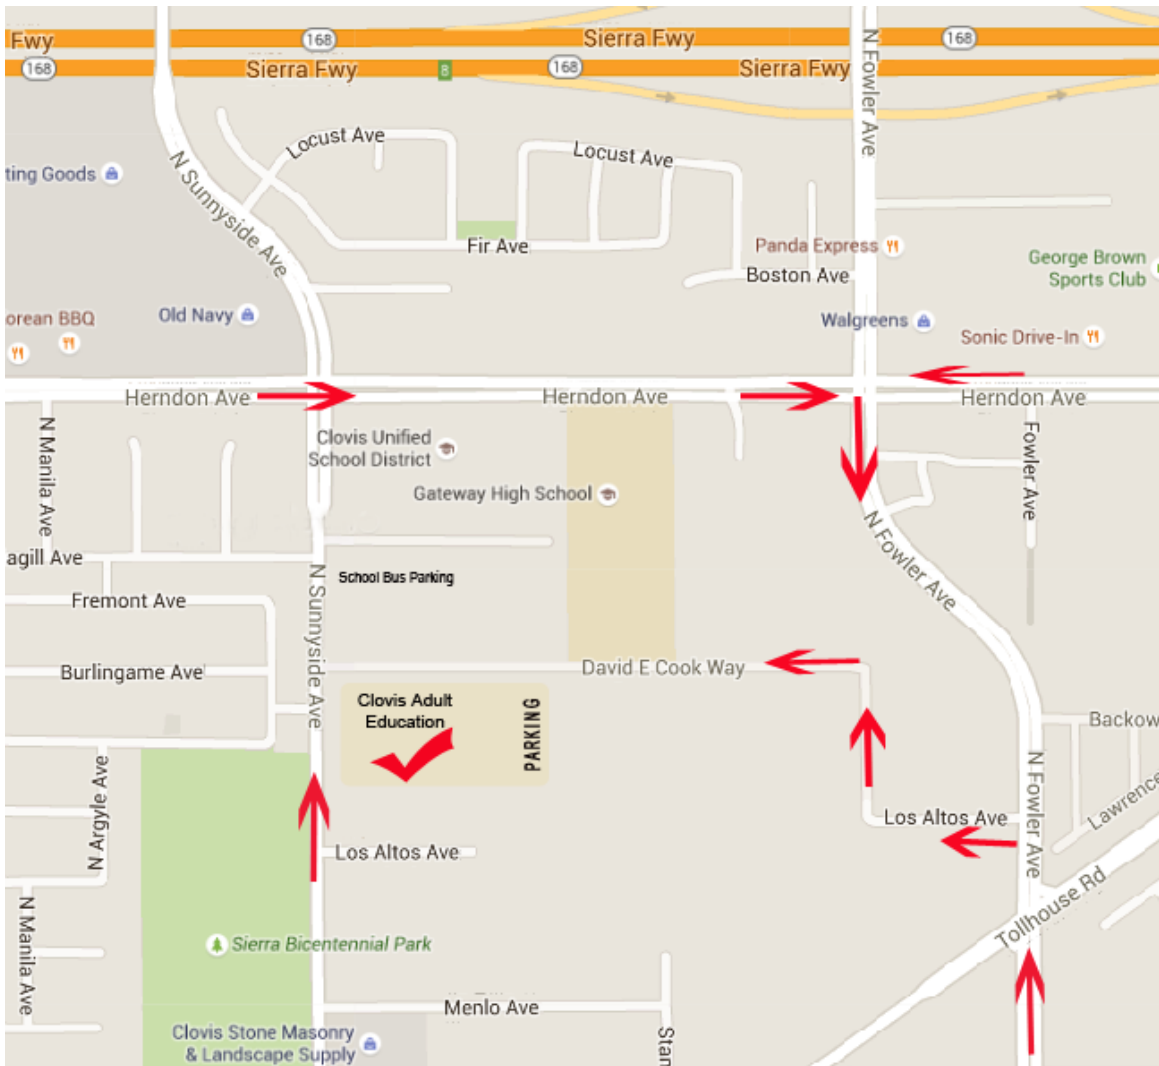

The Parking:

1. To avoid arriving late to class, please arrive early.
2. Parking is available on David E. Cook Way. There is additional parking on the east side of campus. Additional parking is available next to the Police Station.

The Stress:

1. Yes! It will be stressful ... with the dust, ... the noise ... and the inconvenience.
2. We ask everyone for patience.
